

ARIM

Section: arim (1)
Updated: 2018-04-27

NAME

ARIM - Amateur Radio Messaging Program

SYNOPSIS

arim [**-f --config-file** *config*] [**-h --help**] [**-v --version**]

DESCRIPTION

ARIM is a messaging, file transfer and keyboard-to-keyboard chat program. It is designed to use the ARDOP (Amateur Radio Digital Open Protocol) for communication between stations.

DOCUMENTATION

The full documentation is available at <<https://www.whitemesa.net/arim/arim.html>>

OPTIONS

- f --config-file** *FILE*
Read configuration file *FILE* on startup instead of the default *arim.ini* configuration file.
- p --print-conf** *FILE*
Print a listing of successfully parsed configuration file parameters to file *FILE* on startup.
- h --help**
Output a short summary of available command line options.
- v --version**
Print the version of arim, and then exit.
